(an open ended debt scheme investing in government securities having a constant maturity of 10 years.
Relatively High Interest rate risk and Relatively Low Credit Risk)

Haq, ek behtar zindagi ka

Name of the Scheme	UTI Gilt Fund with 10 year Constant Duration																
Category of the Scheme	Gilt Fund with 10 year Constant Duration																
SEBI Code	UTIM/O/D/GTN/21/07/0100																
Type of the scheme	An open ended debt scheme investing in government securities having a constant maturity of 10 years. Relatively High Interest rate risk and Relatively Low Credit Risk.																
Investment Objective	<p>The investment objective of the scheme is to generate optimal returns with high liquidity by investing in a portfolio of government securities such that weighted average portfolio maturity is around 10 years.</p> <p>However there can be no assurance that the investment objective of the Scheme will be achieved. The Scheme does not guarantee / indicate any returns.</p>																
Asset Allocation Pattern of the scheme	<p>The funds collected under the Scheme shall generally be invested in line with the objective of the Scheme in the following manner:</p> <table border="1"> <thead> <tr> <th rowspan="2">Instruments</th> <th colspan="2">Indicative Allocation (% of total asset)</th> <th rowspan="2">Risk Profile</th> </tr> <tr> <th>Minimum</th> <th>Maximum</th> </tr> </thead> <tbody> <tr> <td>Securities issued by the Central and State Governments</td> <td>80%</td> <td>100%</td> <td>Low to Medium</td> </tr> <tr> <td>Triparty Repos on Government Securities or treasury bill, Repo, Reverse Repo on Government Securities & Money Market instruments</td> <td>0%</td> <td>20%</td> <td>Low</td> </tr> </tbody> </table> <p>The Scheme may also take exposure to: Derivatives up to 50% of the net assets of the Scheme.</p> <p>The scheme may take debt derivatives position based on the opportunities available subject to the guidelines issued by SEBI from time to time and in line with the overall investment objective of the scheme. These may be taken to hedge the portfolio, rebalance the same or to undertake any other strategy. The cumulative gross exposure through debt, derivative positions and repo transactions on government securities and such other securities/assets as may be permitted by SEBI from time to time subject to regulatory approvals, if any, shall not exceed 100% of the net assets of the scheme.</p> <p>The Scheme will not participate in repos/reverse repo in corporate debt securities.</p> <p>The scheme will not invest in foreign securities/ securitized debt and shall not engage in short selling and securities lending.</p> <p>Use of Interest Rate Futures (IRFs)</p> <p>In terms of SEBI Circular, SEBI/HO/IMD/DF2/CIR/P/2017/109 dated September 27, 2017, on 'Review of norms for participation in derivatives by Mutual Funds', Interest Rate Futures (IRFs) for imperfect hedging against interest rate volatility by the scheme, subject to applicable investment limits. Some of the key points of circular are as follow:</p> <ol style="list-style-type: none"> To reduce interest rate risk in a debt portfolio, the scheme may hedge the portfolio or part of the portfolio (including one or more securities) on weighted average modified duration basis by using Interest Rate Futures (IRFs). The maximum extent of short position that may be taken in IRFs to hedge interest rate risk of the portfolio or part of the portfolio, is as per the formula given below: $\text{(Portfolio Modified Duration * Market Value of the Portfolio) / (Futures Modified Duration * Futures Price / Par Value)}$ At no point of time, the net modified duration of part of the portfolio being hedged shall be negative. In case the IRF used for hedging the interest rate risk has different underlying security(s) than the existing position being hedged, it would result in imperfect hedging. Imperfect hedging using IRFs will be considered to be exempted from the gross exposure, upto maximum of 20% of the net assets of the scheme, subject to certain conditions such as exposure to IRFs is created only for hedging, the correlation between the portfolio and the IRF is atleast 0.9 etc. as prescribed in above mentioned SEBI circular. <p>Change in Investment Pattern:</p> <p>In accordance with SEBI Circular No. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 04, 2021, the above investment pattern is only indicative and may be changed by the Fund Manager for a short term period on defensive considerations, keeping in view the market conditions, market opportunities, applicable SEBI (MF) Regulations 1996, legislative amendments and other political and economic factors, the intention being at all times to seek to protect the interests of the Unit Holders. Rebalancing of the portfolio will be done when the asset allocation falls outside the range given above. If the exposure falls outside the above mentioned asset allocation pattern, it will be restored within 30 days. If owing to adverse market conditions or with the view to protect the interest of the investors, the fund manager is not able to rebalance the asset allocation within the above mentioned period of 30 days, the same shall be reported to the Internal Investment Committee. The Internal Investment Committee shall then decide the further course of action. In terms of SEBI circular SEBI/HO/IMD/IMD-II DOF3/P/CIR/2022/39 dated March 30, 2022 applicable with effect from 1st July, 2022, states that in case the portfolio of the scheme is not rebalanced within 30 business days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before Investment Committee. The Investment Committee, if so desires, can extend the timelines up to sixty (60) business days from the date of completion of mandated rebalancing period. In case the portfolio of the scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMC's shall not launch any new scheme till the time the portfolio is rebalanced. Reporting and Disclosure Requirements: i. AMC's to report the deviation to Trustees at each stage. ii. In case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme: 1. AMC's have to immediately disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced. 2. AMC's shall also have to immediately communicate to investors through SMS and email / letter when the portfolio is rebalanced. 3. Subject line of the aforementioned emails / letters would clearly indicate "breach of" / "deviation" from mandated asset allocation. iii. AMC's have to disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines. The above mentioned norms shall be applicable to main portfolio only and not to segregated portfolio(s), if any.</p>			Instruments	Indicative Allocation (% of total asset)		Risk Profile	Minimum	Maximum	Securities issued by the Central and State Governments	80%	100%	Low to Medium	Triparty Repos on Government Securities or treasury bill, Repo, Reverse Repo on Government Securities & Money Market instruments	0%	20%	Low

Risk Profile of the Scheme	<p>Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment.</p> <p>Past performance of the Sponsors / AMC / Mutual Fund does not guarantee future performance of the scheme.</p> <p>UTI Gilt Fund with 10 year Constant Duration is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects or returns. There may be instances where no IDCW distribution could be made.</p> <p>Any safety net or guarantee provided: UTI Gilt Fund with 10 year Constant Duration is not a guaranteed or assured return scheme.</p> <p>Scheme Specific Risk Factors</p> <ol style="list-style-type: none"> Risk factors associated with investing in Fixed Income Securities: <ol style="list-style-type: none"> Different types of fixed income securities in which the Scheme would invest as given in the Scheme Information Document carry different levels and types of risk. Investments in corporate debt carry a higher level of risk than investments in Government securities. Further even among corporate debt, AAA/P1+ rated instruments are comparatively less risky than AA/P1 rated instruments. Accordingly, the Scheme risk may increase or decrease depending upon its investment pattern. The Net Asset Value (NAV) of the Scheme will be affected by changes in the general level of interest rates. The NAV of the Scheme is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. 																

	<p>c. Money market instruments, while fairly liquid, lack a well developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.</p> <p>d. As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio. Zero coupon or deep discount bonds are debt obligations that do not entitle the holder to any periodic payment of interest prior to maturity or a specified date when the securities begin paying current interest and therefore, are generally issued and traded at a discount to their face values. The discount depends on the time remaining until maturity or the date when securities begin paying current interest. It also varies depending on the prevailing interest rates, liquidity of the security and the perceived credit risk of the Issuer. The market prices of zero coupon securities are generally more volatile than the market prices of securities that pay interest periodically.</p> <p>e. Apart from normal credit risk, zero coupon bonds carry an additional risk, unlike bonds that pay interest throughout the period to maturity, zero coupon instruments/deferred interest bonds typically would not realise any cash until maturity. If the issuer defaults, the Schemes may not obtain any return on its investment.</p> <p>f. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the regulatory limits, the AMC may choose to invest in unlisted securities as permitted for investment by the scheme that offer attractive yields. This may however increase the risk of the portfolio.</p> <p>g. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Scheme incurring losses till the security is finally sold.</p> <p>h. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Units of the Scheme can go up or down because of various factors that affect the capital markets in general.</p> <p>i. As the liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or restructuring of the Scheme. In view of the above, the Trustee has the right, in its sole discretion, to limit redemptions (including suspending redemptions) under certain circumstances, as described under 'Right to Limit Redemptions' in Section 'Special Considerations', if any, on the right to freely retain or dispose of units being offered'.</p> <p>j. At times, due to the forces and factors affecting the capital market, the Scheme may not be able to invest in securities falling within its investment objective resulting in holding the monies collected by it in cash or cash equivalent or invest the same in other permissible securities / investments amounting to substantial reduction in the earning capability of the Scheme.</p> <p>k. The Scheme at times may receive large number of redemption requests, leading to an asset-liability mismatch and therefore, requiring the investment manager to make a distress sale of the securities leading to realignment of the portfolio and consequently resulting in investment in lower yield instruments.</p> <p>l. Prepayment Risk: Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.</p> <p>m. Reinvestment Risk: This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.</p> <p>n. Performance of the Scheme may be affected by political, social, and economic developments, which may include changes in government policies, diplomatic conditions, and taxation policies.</p> <p>o. Investments in money market instruments involve credit risk commensurate with short term rating of the issuers.</p> <p>2. Risk factors associated with Creation of Segregated Portfolio –</p> <p>a. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.</p> <p>b. Security comprises of segregated portfolio may not realise any value.</p> <p>c. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</p>
<p>Plans and Options Offered</p>	<p>The Scheme offers following Plans:</p> <p>Regular Plan</p> <p>*Direct Plan</p> <p>Both the plans offer following options</p> <p>a. Growth Option</p> <p>b. Quarterly Payout of Income Distribution cum capital withdrawal option</p> <p>c. Quarterly Reinvestment of Income Distribution cum capital withdrawal option</p> <p>d. Half Yearly Payout of Income Distribution cum capital withdrawal option</p> <p>e. Half Yearly Reinvestment of Income Distribution cum capital withdrawal option</p> <p>f. Annual Payout of Income Distribution cum capital withdrawal option</p> <p>g. Annual Reinvestment of Income Distribution cum capital withdrawal option</p> <p>h. Flexi Payout of Income Distribution cum capital withdrawal option</p> <p>i. Flexi Reinvestment of Income Distribution cum capital withdrawal option</p> <p>In case where no option is exercised by the applicant / unitholder at the time of making his investment or subsequently he will be deemed to be under the Growth Option and his application will be processed accordingly.
