<p>Risk Profile of the Scheme</p>	<p>Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment.</p> <p>Past performance of the Sponsors / AMC / Mutual Fund does not guarantee future performance of the scheme.</p> <p>UTI Balanced Advantage Fund is only the name of the scheme and does not in any manner indicate either the quality of the scheme or its future prospects or returns. There may be instances where no IDCW distribution could be made.</p> <p>Safety net or guarantee provided – UTI Balanced Advantage Fund is not a guaranteed or assured return scheme.</p> <p>1. Scheme specific risks factors</p> <ol style="list-style-type: none"> Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, even though it is intended to generate capital appreciation and maximize the returns by actively investing in equity/ equity related securities. The value of the investments in the scheme, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the equity and equity related investments made by the Scheme which could cause the scheme to miss certain investment opportunities. Different segments of the financial markets have different settlement periods, and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The inability of the Scheme to make intended securities purchases due to settlement problems could also cause the Scheme to miss certain investment opportunities. By the same rationale, the inability to sell securities held in the scheme's portfolio due to the absence of a well developed and liquid secondary market for debt securities would result, at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in the scheme's portfolio. Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the regulatory limits, the AMC may have chosen to invest in unlisted securities as permitted for investment by the scheme. Listed securities which may become unlisted in future may increase the risk in the portfolio. The Scheme may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives. The Scheme may also invest in ADRs / GDRs as permitted by Reserve Bank of India and Securities and Exchange Board of India. To the extent that some part of the assets of the scheme may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. <p>The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.</p> <ol style="list-style-type: none"> The scheme intends to deploy funds in money market instruments to maintain liquidity. To the extent that some assets/funds are deployed in money market instruments, the scheme will be subject to credit risk as well as settlement risk, which might affect the liquidity of the scheme. <p>2. Risk factors associated with Creation of Segregated Portfolio –</p> <ol style="list-style-type: none"> Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer. Security comprises of segregated portfolio may not realise any value. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV. <p>3. Risks associated with writing covered call options for equity shares</p> <p>Listed below are the risks associated with writing covered call options, in addition to the risks associated with derivative instruments.</p> <ul style="list-style-type: none"> Market Risk: Appreciation in the underlying equity shares could lead to loss of opportunity in case of writing of covered call option. In case if the appreciation in equity share price is more than the option premium received, the appreciation in the scheme would be capped. Liquidity Risk: This strategy of writing covered call in a scheme will be used, provided the scheme has adequate number of underlying equity shares as per regulatory requirement. Subsequently, the scheme will have to set aside a portion of investment in the underlying equity shares. <p>Further, in case the covered call options are sold to the maximum extent as allowed under the purview of regulations, the scheme would be unable to sell the shares of the respective stock, to the extent that would be blocked under the covered call. Hence, if the call option contracts which have been written become illiquid, it may lead to a loss of opportunity or can cause exit issues.</p> <p>As a result, it may happen that the scheme is not able to sell the underlying equity shares immediately, which can lead to temporary illiquidity of the underlying equity shares and may result in loss of opportunity.</p>																																				
<p>Plans and Options offered</p>	<p>The scheme offers following Plans Regular Plan Direct Plan</p> <p>Both the Plans offer following options: (a) Growth Option (b) Payout of Income Distribution cum capital withdrawal Option (Payout of IDCW Option) In case no option is indicated in the application form, then the default option will be the Growth Option.</p> <p>Direct Plan: Direct Plan is only for investors who purchase/subscribe units directly with the Fund and is not available for investors who route their investments through a Distributor.</p> <p>All categories of Investors as permitted under this SID are eligible to subscribe under Direct Plan.
