<b>Risk Profile of the Scheme</b>	<p>Mutual Fund investments are subject to market risks. Please read the SID carefully for details on risk factors before investment.</p> <p>Past performance of the Sponsors / AMC / Mutual Fund does not guarantee future performance of the scheme.</p> <p><b>Safety net or guarantee provided</b> – The Scheme does not provide any guarantee or assured return.</p> <p><b>1. Scheme specific risks factors</b></p> <ol style="list-style-type: none"> <li>Investors may note that AMC's/Fund Manager's investment decisions may not always be profitable, even though it is intended to generate capital appreciation and returns by passively investing in equity/ equity related securities.</li> <li>The value of the investments in the scheme, may be affected generally by factors affecting securities markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or policies of any appropriate authority and other political and economic developments and closure of stock exchanges which may have an adverse bearing on individual securities, a specific sector or all sectors including equity and debt markets. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down.</li> <li>Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the equity and equity related investments made by the Scheme which could cause the scheme to miss certain investment opportunities. Different segments of the financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The inability of the Scheme to make intended securities purchases due to settlement problems could also cause the Scheme to the a certain investment opportunities. By the same rationale, the inability to sell securities held in a Scheme's portfolio due to the absence of a well-developed and liquid secondary market for debt securities would result, at times, in potential losses to the Scheme, in case of a subsequent decline in the value of securities held in a Scheme's portfolio.</li> <li>Securities, which are not quoted on the stock exchanges, are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. Within the regulatory limits, the AMC may have chosen to invest in unlisted securities as permitted for investment by the scheme. Listed securities which may become unlisted in future may increase the risk in the portfolio.</li> <li>The Scheme may use various derivative products as permitted by the Regulations. Use of derivatives requires an understanding of not only the underlying instrument but also of the derivative itself. Other risks include, the risk of mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Usage of derivatives will expose the Scheme to certain risks inherent to such derivatives.</li> <li>The scheme intends to deploy funds in money market instruments to maintain liquidity. To the extent that some assets/funds are deployed in money market instruments, the scheme will be subject to credit risk as well as settlement risk, which might affect the liquidity of the scheme.</li> <li><b>Portfolio Concentration Risk:</b> Index Funds being a passive investment carries lesser risk as compared to active fund management. The portfolio follows the index and therefore the level of stock concentration in the portfolio and its volatility would be the same as that of the index, subject to tracking error. Thus there is no additional element of volatility or stock concentration on account of fund manager's decisions.</li> </ol> <p><b>2. Risk factors associated with Creation of Segregated Portfolio –</b></p> <ol style="list-style-type: none"> <li>Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.</li> <li>Security comprises of segregated portfolio may not realise any value.</li> <li>Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.</li> </ol> <p><b>3. Risks Associated with scheme</b></p> <ol style="list-style-type: none"> <li>UTI S&amp;P BSE Low Volatility Index Fund is passively a managed index fund i.e. the amount collected under the scheme is invested in securities of companies comprising the underlying index in the same weightages as they have in the underlying index.</li> <li>The composition of the underlying index is subject to changes that may be affected periodically by the Index Service Provider.</li> <li>Performance of the underlying index will have a direct bearing on the performance of the scheme.</li> <li>The extent of the Tracking error may have an impact on the performance of the scheme.</li> </ol>																																																																																																
<b>Plans and Options Offered</b>	<p><b>The Scheme offers following Plans:</b></p> <p>Regular Plan Direct Plan</p> <p><b>Both the plans offer only Growth Option.</b></p> <p><b>Direct Plan:</b></p> <p>Direct Plan is only for investors who purchase/subscribe units directly with the Fund and is not available for investors who route their investments through a Distributor.</p> <p>The Direct Plan will be a separate plan under the Scheme and shall have a lower expense ratio excluding distribution expenses, commission etc. and will have a separate NAV.
