	NAV of any particular underlying Silver ETF may result in delay of the computation of the NAV of the scheme.
g.	The Fund will subscribe/redeem according to the value equivalent to unit creation size as applicable for the underlying scheme. When subscriptions/redemptions received are not adequate enough for transaction in creation unit size, the UTI Silver ETF Fund of Fund will buy/sell UTI Silver ETF Fund of Fund units directly on the stock exchange without
	waiting for additional subscription/redemption.
h.	The scheme may invest in debt and money market instruments from time to time, as per the Asset Allocation pattern, which will have a different return profile compared to silver
i.	returns profile. As UTI Silver ETF Fund of Fund is not actively managed, the underlying investments may be affected by a general decline in the domestic price of Silver and other instruments
	invested under the plan. UTI Silver ETF Fund of Fund invests in physical Silver regardless of their investment merit. The AMC does not attempt to take defensive positions in
i Trocki	declining markets. Further, the fund manager does not make any judgment about the investment merit nor shall attempt to apply any economic, financial or market analysis. ng Error and Tracking Difference: Tracking error i.e. the annualised standard deviation of the difference in daily returns between physical Silver and the NAV of Silver ETF based

2%. T	he disclosure regarding the same shall be made on monthly basis on the website of the AMC. Tracking Error is always calculated against the 'Total Returns Index' which shows the
	s on the Index portfolio, inclusive of IDCW. ng error may have an impact on the performance of UTI Silver ETF Fund of Fund. The scheme's ability to achieve close correlation with the underlying benchmark may be impacted
	tors including but not limited to:
•	Buy/Sell transactions at different point of time during the trading session, which may not correspond to the closing price.
·	Delay in purchase/sale of Silver due to: Illiquidity of Silver.
	Delay in realization of Sale proceeds.
	Creation of a lot size to buy the required amount of Silver. Execution of large buy / sell orders.
	The potential for trades to fail, which may result in the Scheme not having acquired Silver at a price necessary to track the benchmark price.
•	Holding of cash equivalents to meet redemptions, expenses, payouts of IDCW etc.
:	Transaction cost (including taxes and insurance premium) and recurring expenses. Delay in realization of unit holder's funds.
In case of una	avoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of
	corrective actions taken by the AMC, if any.
	F, the underlying fund, shall disclose the tracking error based on past one year rolling data, on a daily basis, on the website of respective AMCs and AMFI. associated with investment in UTI Silver ETF
	e will invest in UTI Silver ETF, the scheme will be subject to following risk factors associated with investment in the underlying scheme.
a.	The UTI Silver ETF is a passively managed scheme by providing exposure to Silver and tracking its performance and yield as closely as possible. The scheme performance may be affected by a general decline in the price of Silver. The Scheme invests in the underlying asset viz. Silver regardless of its investment merit.
b.	Investment decisions made by the AMC may not always be profitable.
С.	From time to time and subject to the Regulations, the Sponsors, the Mutual Funds and investment companies managed by them, their associate companies, subsidiaries of the
	Sponsors, and the AMC may invest either directly or indirectly in the Scheme. The funds managed by these associates, the Sponsors, subsidiaries of the Sponsors and /or the AMC may acquire a substantial portion of the scheme's units and collectively constitute a major investor in the scheme. Accordingly, redemption of units held by such funds,
	associates and Sponsors might have an adverse impact on the units of the scheme because the timing of such redemption may impact the ability of other unitholders to redeem
	their units.
d.	Scheme Specific Risk Factors:
	i. Market risk due to volatility in Silver prices
	The value of the Units relates directly to the value of the underlying Silver held by the Scheme and fluctuations in the price of Silver could adversely affect the investment value of the Units. The price of Silver may fluctuate due to various factors such as: –
	(i) Global Silver supplies and demand, which is influenced by factors such as forward selling by Silver producers, purchases made by Silver producers to unwind Silver hedge
	positions, central bank purchases and sales, and productions and cost levels in major Silver producing countries such as the South Africa, the United States, Australia
	and China. (ii) Investor's expectations with respect to the rate of inflation.
	(iii) Currency exchange rates.
	(iv) Interest rates
	(v) Investment and trading activities of commodity funds/hedge funds.
	(vi) Global or regional political, economic or financial events and situations.
	In addition, there is no assurance that Silver will maintain its long-term value in terms of purchasing power in the future. In the event that the price of Silver declines, the value of investment in units in which the scheme has invested will, in general, decline proportionately.
	 The sale of Silver by AMC to pay expenses will reduce the amount of Silver represented by each unit on an ongoing basis irrespective of whether the trading price of the
	units rises or falls in response to changes in the price of Silver.
	iii. The sale of the Scheme's Silver to pay expenses at a time of low Silver prices may adversely affect the value of the units.
	iv. There may be certain circumstances that may motivate large scale sales of Silver which could decrease the price of Silver and adversely affect an investment in the Units.
	 v. There is no assurance that an active secondary market will develop or be maintained. vi. "UTI Silver ETF" is an Exchange Traded Fund. The concept of Exchange Traded Funds is relatively new to Indian capital markets. Trading in UTI Silver ETF could therefore
	be restricted due to which market price may or may not reflect the NAV of UTI Silver ETF at any point of time.
	vii. Trading of UTI Silver ETF unit in the market(s) may be halted because of market conditions or for reasons that in view of SEBI or market authorities trading in UTI Silver
	ETF' unit is not advisable. In addition trading in 'UTI Silver ETF' unit is subject to trading halts caused by extraordinary market volatility and pursuant to SEBI and stock exchange(s) "circuit filter" rules. There can be no assurance that the requirements of the Market necessary to maintain the listing of 'UTI Silver ETF' units will continue to be
	met or will remain unchanged.
	viii. UTI Silver ETF units may trade at a premium / discount to the NAV due to demand/supply conditions in the market(s). Besides, any changes in the trading regulations by
	the Stock Exchanges or SEBI or other applicable regulations may affect the ability of the market participants to arbitrage resulting in wider premium/discount to NAV. ix. The Scheme's Silver may be subject to loss, damage, theft or restriction on access. There is a risk that part or all of the Scheme's Silver could be lost, damaged or stolen.
	Access to the Scheme's Silver could also be restricted by natural events (such as earthquake) or human actions (such as terrorist attack). Any of these actions may
	adversely affect the operations of the scheme and consequently an investment in units.
	x. Impact cost risk: The scheme may have to bear the impact cost arising from purchase and sale of Silver either when the scheme accepts/gives cash or cash equivalents in lieu of Silver.
	Impact costs are implicit costs also paid by liquidity demanders to liquidity providers. Generally, the best bid and ask prices quoted in the market are for only small
	transactions. Larger transactions may have to be executed at even less favorable prices. The additional cost is called an impact cost. For e.g. if the ruling market price of a
	security is '500/ – one may be able to buy/sell small quantities for that price. But, if one wishes to buy/sell huge quantities he might have to pay /receive higher/lower price. The same principle applies for Silver also.
	 changes in indirect taxes like GST, custom duties for import, etc or any other levies will have an impact on the valuation of Silver and consequently the NAV of the
	Scheme.
	xii. Redemption orders may be subject to postponement, suspension or rejection by the Trustee under certain circumstances.
	xiii. Conversion of underlying Silver to "UTI Silver ETF" units may attract capital gains tax depending on the acquisition cost and holding period of Silver to the investor.
	Redemption of "UTI Silver ETF" by the AMC or sale of "UTI Silver ETF" on the Stock Exchange(s) may attract short or long term capital gain tax depending upon the holding period of the units. Moreover, converting "UTI Silver ETF" to Silver may also attract Wealth tax.
e.	Liquidity risks in physical or derivative markets impairing the ability of the fund to buy and sell Silver
	Commodities tend to be more volatile than other instruments. This may have an impact on liquidity. Liquidity considerations may have a price basis risk. Liquidity risks may arise
	due to issues related to the supply chain which affects the availability of Silver. During an undetermined situation, similar to what happened during the pandemic, transportation all over the world had come to a standstill. Financial markets had experienced extreme volatility and severe losses, and trading in many instruments had been disrupted. Liquidity for
	many instruments had been greatly reduced for periods of time, and most commodities were in short supply resulting in illiquid markets for most commodities including Silver. The
	lack of liquidity in the physical market may also arise due to seasonality of demand and supply or volatility prices. Lastly, government regulations including change in taxation or
	duties levied on Silver may affect the demand and supply and may affect the liquidity.

	f. Risks associated with handling, storing and safekeeping of	of physical Sliver	
	All physical Silver procured must follow the LBMA (London Bu	llion Market Association) guidelines as per prescribed SE	BI guidelines.
	Risk arises when part or all of the Silver held by the Scheme
