 - Business and promoter risks
 - High volatility, lower liquidity and high impact cost
- **How to mitigate the risks**
 - Sound risk framework in place
 - Stock picking is the key
- **Why invest in a Small Cap Fund, today?**
 - Market cap share could rise
 - Valuation comfort
 - Opportunity to benefit from mean reversion
- **UTI Small Cap Fund**

Diverse opportunities across sectors

Indices Sector Weights

■ Nifty Smallcap 250 ■ Nifty Midcap 150 ■ Nifty 100

Small cap opportunities are more balanced than the large cap universe

Haq, ek behtar zindagi ka.

Ability to invest in niches

New and emerging business models often emerge in small cap space

Full benefit of niche opportunity is available in small cap space

Source: Bloomberg, Company reports. Revenue break-up internal estimates

The chart above is for illustrative purposes only and should not be construed as advice. The above is to illustrate the concept of identifying stocks/sectors in the market and not an endorsement by the Mutual Fund and AMC of their soundness or a recommendation to buy or sell these stocks at any point of time. There is also a possibility of the expected event not happening or some other unforeseen event that may affect performance of the company. The performance of stocks would ultimately depend on various factors such as prevailing market conditions, global political scenario, exchange rate etc. Investors are requested to note that there are various factors (both local and international) that can have impact on the future performance and expectations of any company. There is no assurance or guarantee of any company being able to sustain its performance in future and above information should not be construed as research report or a recommendation to buy or sell any security.

Wealth creation from investing in niches

Leading Player in Chemicals Industry

- Business built on end-to-end partnerships with global innovators based on reliability, trust and respect for IP
- Proven capabilities in agrochemicals; now ready to be replicated across other chemicals segments
- 51% of the total workforce is < 35 years of age and highly qualified

Source: Bloomberg, Company Reports

Leading QSR Player

- One of the largest food chain company in India with over 1,350 restaurants across 288 cities as of Jun-20
- Has a robust business model, efficient supply chain, extensive network of certified partners
- Food Services Industry (FSI) is one of the fastest growing sector driven by changing lifestyles

Source: Bloomberg, Company Reports

Small caps may have potential to scale-up and emerge as market leader in the future

QSR – Quick service restaurant; EBITDA – Earnings before interest, taxes, depreciation, and amortization

Return outcome could have wide range

1 Year Period Rolling Returns – 15 Years Period

Brace for higher volatility in small cap space, particularly in short-term

RAR – Risk Adjusted Return

Source: MFI Explorer. Returns are in CAGR (Compound Annual Growth Rate). Data period – October 31, 2005 to October 31, 2020
Market Cap Representation: Large Cap: Nifty 100 TRI, Mid Cap: Nifty Midcap 150 TRI, Small Cap: Nifty Smallcap 250 TRI

Liquidity and Impact cost challenges

Market cap / Turnover (Volume) / Impact Cost of Indices (weighted average)

Small caps are exposed to lower liquidity and higher impact cost

Source: Bloomberg. Data as of October 31, 2020. Market turnover and impact cost is based on securities traded for the month of October 2020.

Market Cap Representation: Large Cap: Nifty 100, Mid Cap: Nifty Midcap 150, Small Cap: Nifty Smallcap 250

Above is purely an illustration on how low liquidity and market depth can have an impact on transaction costs. There are also other risks associated to investing in small caps and investors are advised to read the scheme information document (SID) for the detailed risk factors associated to the fund.

Haq, ek behtar zindagi ka.

Exposed to business and promoter risks

- More vulnerable to business cycles
- Lesser access to low cost capital
- Hard to attract professionals or quality managerial staff
- High product and geographical concentration
- Lower scale benefits resulting in higher overhead costs
- Newer businesses may have limited track record

Risk mitigation strategies are the way-out

Framework for finding stock ideas

Stock selection driven by

- Analyst/Fund Manager conviction on ideas
- Choice of stocks across the OCF & RoCE tiers
- Market cap allocation
- Qualitative factors - Management quality, scalability, company vision etc.,
- Active portfolio management based on risk-return evaluation

OCF – Operating Cash Flow; RoCE – Return on Capital Employed. OCF Tiers (C)- 3 Tiers based on the number of years in which they have generated positive operating cash flows in the previous 5 years (for manufacturing companies). RoCE/ Implied RoE Tiers (R) - 3 Tiers based on the previous 5 year average return on capital (for manufacturing companies & non-lending non banking finance companies (NBFCs)) & based on the previous 5 year average return on asset for banks & NBFCs (including housing finance companies).
Data as of September 30, 2020

360° risk assessment framework

Diversified Portfolio

Maintain judicious portfolio diversification across stocks and sectors

Position Sizing

Based on the relative conviction, market depth and overall stock level risks

Research Framework

Standardized and in-depth research methodology to consistently identify good stocks and avoid poor stocks

Portfolio Review

Continuous evaluation and monitoring of risk parameters and companies in the portfolio

Risk comes from NOT knowing what you're doing – Warren Buffet

Stock picking is key in small caps

Return range of companies in Nifty 500 Index – 5 years period

Plans Available

The Scheme offers following Plans:
Regular Plan
Direct Plan

Both the plans offer following Options:
Growth Option
Dividend Payout Option

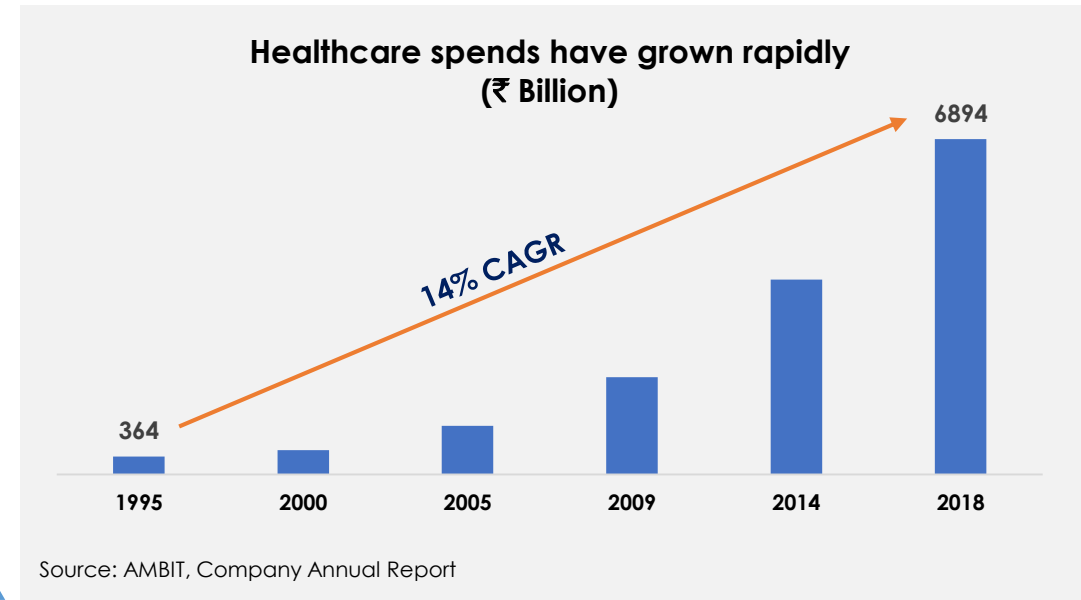

Haq, ek behtar zindagi ka.

A few illustrative stock ideas >>

Leading hospital chain

- Hospitals have the largest share (~68%) of Indian healthcare industry pegged at about ₹ 10 trillion
 - Private hospitals account 60% of beds whereas corporate chains account for only 10% of bed capacity
- Hospitals have grown at 14% CAGR over 1995-2018 and are expected to demonstrate double digit growth going ahead
- India remains deficient in terms of healthcare infrastructure available
 - India's share of global disease burden is ~20%; however, share of beds is only about 6% and share of doctors/nurses is 8%
- One of the largest hospital chain company in India with about 5900 beds
 - 90% of the beds have become mature (>5 years) leading to increasing margins and RoCEs

CAGR – Compound Annual Growth Rate; RoCE – Return on Capital Employed

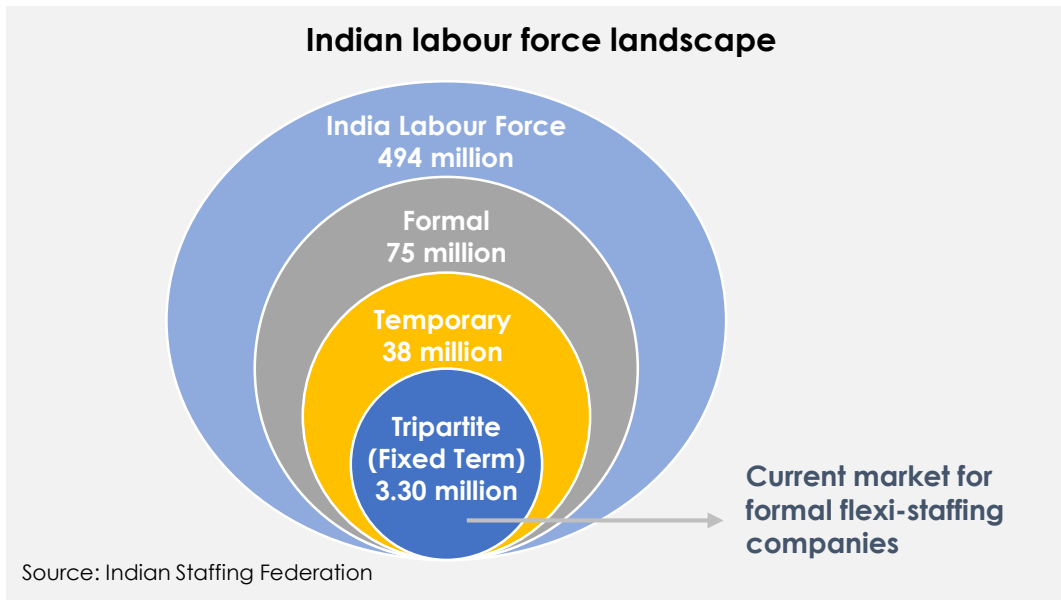

Data Source: Bloomberg and company reports. The chart above is for illustrative purposes only and should not be construed as advise. The above is to illustrate the concept of identifying stocks in the market. There is also a possibility of the expected event not happening or some other unforeseen event that may affect performance of the company. The performance of stocks would ultimately depend on various factors such as prevailing market conditions, global political scenario, exchange rate etc. Investors are requested to note that there are various factors (both local and international) that can have impact on the future performance and expectations of any company. Information given is available in public domain. There is no assurance or guarantee of any company being able to sustain its performance in future. There is no assurance or guarantee that the scheme would invest in this stock.

Haq, ek behtar zindagi ka.

A play on formalization of employment

- Flexi-staffing is a large market in India – fragmented and highly unorganized. The key value propositions for the clients are flexibility and reduced compliance burden.
- Indian formal flexi-staffing growth is ~14% CAGR (on headcount), however the penetration is still less than 1% of overall labour force.
- While simplification of labour laws makes the compliance value proposition less effective, formalization remains a key growth driver. If make-in-India initiative of government completely plays-out, flexi-staffing companies would be key beneficiaries.
- The company has high standards of corporate governance and capital allocation has been prudent. It offers a multi-year high growth opportunity, with scope for operating leverage.

CAGR – Compound Annual Growth Rate; RoCE – Return on Capital Employed

Data Source: Bloomberg and company reports. The chart above is for illustrative purposes only and should not be construed as advise. The above is to illustrate the concept of identifying stocks in the market. Information given is available in public domain. There is no assurance or guarantee of any company being able to sustain its performance in future. There is no assurance or guarantee that the scheme would invest in this stock.

Haq, ek behtar zindagi ka.

A capital efficient diversified engineering company

- Diversified component supplier to automobile & industrial segments like railways, process industries
- Dominant supplier of tubes to 2W & high precision tubes to industrial segment
- Second-largest cycle manufacturer – a cash rich business
- Play on turnaround of distressed asset in power products business
- VC-type capital allocator into emerging technology business with large revenue potential
- Significant improvement in FCF generation & RoCE improvement driven by cost efficiencies

2W – Two Wheelers; VC – Venture Capital; FCF – Free Cash Flow; RoCE – Return on Capital Employed

Data Source: Bloomberg and company reports. The chart above is for illustrative purposes only and should not be construed as advise. The above is to illustrate the concept of identifying stocks in the market. There is also a possibility of the expected event not happening or some other unforeseen event that may affect performance of the company. Haq, ek behtar zindagi ka.

Leading tractor player with a focus on improving market share

- Continues its focus on gaining market share (+120 bps in the past 5 years), strategy of dual-brand and network expansion
- Its second leg (railways segment) has been a combination of robust growth and high profitability
- Its construction equipment segment has been a turnaround story, division is likely to benefit post tie up with MNC players
- Fortified relationship with Japanese player; focus areas include new products, component mfg., and leveraging global network.
- Capital allocation and efficiency has been the focus area, which has resulted in improving RoCE

MNC – Multi National Company; RoCE – Return on Capital Employed; PAT Margin – Profit after Tax Margin; RoE – Return on Equity

Data Source: Bloomberg and company reports. The chart above is for illustrative purposes only and should not be construed as advise. The above is to illustrate the concept of identifying stocks in the market. How would the portfolio look today?

Aims to strike a balance between risk & return through bottom-up stock picking approach

Above is based on the model portfolio as of Oct-2020, actual portfolio may differ depending upon market conditions at time of funds deployment.

*Active weight is based on model portfolio sectoral weight versus benchmark index (Nifty Smallcap 250) weights of Oct-2020. The actual portfolio might vary from what is above mentioned and is dependent on the market conditions at the time funds deployment.

Who should invest in UTI Small Cap Fund?

Risk Allocation

Investors looking to add a high risk strategy to balance an overall conservative portfolio construct

Return Expectation

Investors seeking higher returns relative to other diversified equity funds and willing to ride the underlying portfolio volatility

Investment Route

Investors looking for allocation either lump sum or staggered route (SIP/STP)

Time Horizon

Investors looking for investments over medium to long-term horizon

Why invest in UTI Small Cap Fund?

- A true-to-label small-cap fund with a focus on scalable business models and long growth runway.
- Portfolio with zero large cap names, however, a mid cap growing to large cap may be part of the portfolio.
- Small-Caps have limited coverage on the sell side. UTI covers a large cross section of companies in the small-cap universe. Coupled with strong investment processes, enables this fund to benefit from such opportunities.
- Well-established risk management practices.
- The Fund maintains a well-diversified portfolio and follows a patient approach towards companies in the portfolio.

Suitable for:

- Investors looking for investment in a portfolio that invests predominantly in small sized companies
- Suitable for investors with high risk taking ability and seeking to benefit from the potential high growth opportunity from a portfolio predominantly investing in small caps.
